

Backend Developer

Company: TechNova Solutions Pvt. Ltd.

Location: Kolkata, India / Hybrid **Employment:** Full-time

Experience: 3+ years of professional backend development experience.

Job Summary

We are looking for a Backend Developer to design, develop, and maintain scalable APIs and backend services. The role involves database design, API development, authentication, testing, and collaboration with frontend engineers.

Key Responsibilities

- Design and develop RESTful APIs using Python and FastAPI.
- Build reliable backend services with clear separation of concerns and reusable modules.
- Design database schemas and write efficient queries using PostgreSQL.
- Implement authentication, authorization, validation, and secure API practices.
- Integrate third-party services and external APIs.
- Write unit and integration tests and troubleshoot backend issues.
- Use Git workflows and collaborate with frontend, DevOps, and product teams.
- Monitor application performance and participate in production debugging.

Required Skills

- Python
- FastAPI
- REST API development
- PostgreSQL
- SQL
- Git and GitHub
- Authentication and authorization

Preferred Skills

- Docker
- Redis
- Celery
- AWS
- MongoDB
- Pytest
- CI/CD pipelines

Education

Bachelor's degree in Computer Science, Information Technology, or a related field, or equivalent practical experience.

What We Value

Clean and maintainable code, clear communication, practical problem solving, collaboration, and a strong focus on delivering reliable production software.
